Summary

Versatile Developer with a primary focus on mobile application development using Flutter and Dart. Skilled in building innovative, user-friendly apps with clean, efficient code. In addition to app development, I have a solid foundation in full-stack web development using the MERN stack and an emerging interest in data analytics and visualization. A fast learner, effective team player, and problem solver who actively keeps up with evolving tech trends and best practices across multiple domains

Education

Air University Islamabad **Sep 2021 - July 2025**
Bachelors in Computer Science Lahore, Pakistan

Punjab Group of Colleges (PGC) **Feb 2018 - July 2020**
FSC Pre-Engineering Lahore, Pakistan

Experience

AIONS Lahore, Pakistan
A startup working on app development, game development, web development, and various other technologies.
Intern **Sept 2023 - Dec 2023**

- Contributed to the development of CHAPERONE, a companion website, utilizing HTML, CSS, and basic JavaScript.

MyImpactMeter Lahore, Pakistan
My Impact Meter (MIM) is Pakistan's first digital impact platform that connects donors with beneficiaries through prepaid service vouchers for essentials like food, healthcare, and education, ensuring transparent, traceable giving.
Intern **July 2024 - Sep 2024**

- Worked on Flutter app development, implementing REST APIs, managing user authentication, and optimizing performance. Gained experience with agile workflows, including sprints and code reviews.

Devverse Islamabad, Pakistan
Software Development with strong emphasis on AI-driven web apps, machine learning, 3D modeling, blockchain, and customized development solutions
Freelance **Mar 2025 - Apr 2025**

- Contributed to backend integrations and frontend development using Flutter and GetX. Key tasks included:
  - User registration and playlist management via REST APIs
  - UI development and integration
  - Local data handling with SharedPreferences
  - API response debugging and error handling

Awards and Certificates

Great Learning **2023**

- Completed beginner-level courses in UI/UX design and Flutter with Dart, covering design basics, widgets, and app development fundamentals.

Skills

- **Computer Languages:** dart**,** JavaScript, C++, HTML, CSS, Python
- **Databases:** Firebase
- **Tools:** Visual Studio Code, Postman, Git, Figma
- **Soft Skills:** Team Collaboration, Problem Solving, Creativity, Adaptability, Multi-Tasking
- **Languages:** English, Urdu

Projects

Easy First Aid (Dart, Flutter, Python, Firebase) **2024**
Developed a smart first aid mobile app using Flutter and Firebase that offers instant medical support through AI. Key features include symptom checking, injury detection via image analysis, fall detection using phone sensors, real-time parent-child tracking, emergency calling, and an AI chatbot powered by Gemini
