MUHAMMAD NOMAN

Full-Stack Software Engineer | React.js, Next.js, TypeScript, Node.js

Lahore, Pakistan | +92-321-6013698 | buttnoman778@gmail.com | linkedin.com/in/noman210900 | github.com/Paradox-20002

PROFESSIONAL SUMMARY

Full-stack developer with a BS in Computer Science and 2+ years of combined professional and freelance experience building web applications with React.js, Next.js, TypeScript, and Node.js. Works on both sides of a product: PostgreSQL/Prisma data models and REST APIs on the back end, fast and responsive interfaces on the front, then deploys it all to production. Has built AI-driven features (AI image analysis, voice interfaces, WebMCP agent integration) and uses AI coding tools to speed up work while reviewing everything before it ships. Delivers 90+ Lighthouse scores on client projects and is comfortable in Agile/Scrum teams, code reviews, and working independently.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, Dart

Front-End: React.js, Next.js (SSR/SSG), Redux Toolkit, Tailwind CSS, Framer Motion, Responsive Web Design, Reusable Components, Cross-Browser Compatibility

Back-End & Data: Node.js, REST APIs, JSON, PostgreSQL, Prisma (Schema Design, Migrations), Role-Based Access Control, Headless CMS, NodeMailer, Third-Party API Integration

AI & Emerging Tech: AI Image Analysis Integration, WebMCP (Agent Workflows), Web Speech API, AI Coding Tools (Cursor AI)

Testing & Debugging: Jest (Unit Testing), Cross-Browser Testing, Debugging, Postman, Lighthouse, Core Web Vitals

Tools & Deployment: Git, GitHub, Vercel, Render, CDN Asset Delivery, Agile/Scrum, Code Reviews

CS Fundamentals: Data Structures & Algorithms, Asynchronous Programming (Promises, async/await)

Mobile & Learning: Flutter, Firebase; currently learning Cypress, GraphQL, Vue.js 3

PROFESSIONAL EXPERIENCE

Associate Software Engineer | Enoves *Oct 2025 – Present | Lahore, Pakistan*

- Build and ship full-stack web applications with **Next.js, React.js, TypeScript, Node.js, and Tailwind CSS**, taking features from requirements and designs through to deployment.
- Own an internal blog CMS end-to-end: designed the PostgreSQL/Prisma data model, built the REST APIs, and developed the Next.js interface, so the marketing team can publish without a developer.
- Built a booking platform for a North American client (niagaralimo.ca) with Next.js, Node.js, and Framer Motion, covering the server-side logic, automated email dispatch, external API integrations, and polished micro-interactions. Deployed on Vercel with CDN asset delivery.
- Standardized UI and performance workflows with Tailwind CSS and Next.js, reaching **90+ Lighthouse** scores for performance, accessibility, and SEO across client sites.
- Use AI coding tools (Cursor AI) to move faster, and review and test everything before it ships.

Next.js Developer | Techionik Ltd *Feb 2026 – May 2026 | Lahore, Pakistan*

- Developed pixel-perfect, responsive UIs with Next.js, React, TypeScript, and Tailwind CSS; used lazy loading and asset optimization to improve Core Web Vitals and keep load times under a second.
- Built a voice-driven accessibility layer with the Web Speech API and React state management for real-time speech-to-text and hands-free form completion.
- Integrated the frontend with a headless CMS through REST APIs, added JSON-LD structured data to improve SEO indexing, and tested across browsers for consistent behavior.

PROJECTS

- **Nucleus, Internal Blog CMS** (Next.js, Node.js, PostgreSQL, Prisma, REST APIs): Full-stack CMS built from database schema to UI, with role-based access control, rich text WYSIWYG editing, and a headless REST API that publishes content without code deployments.
- **Rideflow, Vehicle Rental SaaS Platform** (Next.js, React, TypeScript, Tailwind CSS, Node.js, PostgreSQL, Prisma, REST APIs): Full-stack multitenant fleet management platform with a REST API and database layer behind real-time booking flows, invoicing, digital contract signoffs, and role-based dashboards for admins, clients, and drivers.
- **Niagara Limo, Production Booking Website** (Next.js, Node.js, NodeMailer, Framer Motion, Vercel): Full-stack site for a North American transport company with server-side email dispatch, external API integrations, and conversion-focused UX.
- **Techionik, AI-Ready Agency Web Application** (Next.js, JSON-LD, WebMCP, Web Speech API): JSON-LD Graph schemas and WebMCP integration for agent workflows, plus a voice dictation layer for hands-free inquiry forms (techionik.com).
- **Easy First Aid, Mobile Application** (Flutter, Dart, Firebase): Cross-platform app with AI image analysis for injury identification, sensor-driven fall detection, and Firestore real-time sync.

EDUCATION

Bachelor of Science in Computer Science | Air University Islamabad *Sep 2021 – Jul 2025*
